

Discover[®] **MIXTECH**EMX

THE MOST SIGNIFICANT IMPROVEMENT IN A BATTERY IN 50 YEARS.

VEHICLES HAVE EVOLVED. ISN'T IT TIME BATTERIES EVOLVE TOO?

MIXTECH EMX Premium Flooded batteries combine patented acid mixing technology with expanded metal grids and advanced active materials to produce premium batteries for most conventional modern vehicles equipped with standard accessories.

EMX batteries are tested and proven to provide dramatically improved active material utilization, delivering 2x the micro-cycle life of comparable conventional batteries and 1.5x the cycle life of replacement market EFB batteries.

MIXTECH EMX batteries can be used to replace original equipment EFB and AGM batteries.

MIXTECH BATTERY

The motion of your vehicle causes the electrolyte to circulate and continuously mix preventing acid stratification.

TRADITIONAL BATTERY

Without MIXTECH, acid in the electrolyte settles at the bottom which leads to excess corrosion and charge imbalance. This is known as acid stratification.

THE #1 CAUSE OF BATTERY FAILURE IS ACID STRATIFICATION. THAT'S BAD. WE FIXED THAT.

innovationaward

EXCEEDS OEM
SPECIFICATIONS

MIXTECH batteries meet or exceed original equipment manufacturers' (OEM) performance and quality requirements.

START-STOP
MICRO-CYCLING

MIXTECH supports the micro-cycling and partial state of charge use typical of long urban commutes and in start-stop and anti-idle vehicles.

VIBRATION
RESISTANT

Element bonding utilizes two rows of glue applied along the top of the cell groups that help resist positive plate growth and reduces vibration related failures.

EXTREME
TEMPERATURES

Patented acid mixing technology eliminates thermal gradients and improves life at extreme temperatures.
